

# Contents

<b>Preface</b>	IX
<b>List of Abbreviations</b>	XIII
<b>1 Introduction to EMC</b>	1
1.1 Electromagnetic compatibility (EMC)	1
1.2 Terminology	2
1.3 Electromagnetic interference (EMI)	5
1.4 Prevention of EMI	10
1.5 About this book	17
<b>2 Describing the electromagnetic environment</b>	21
2.1 Introduction	21
2.2 Wavelength as yardstick	22
2.3 Emission via conduction	25
2.4 Emission via radiation	35
2.5 Time domain and frequency domain	45
2.6 The decibel (dB) and some practical units	50
<b>3 EMI properties of passive components</b>	53
3.1 Introduction	53
3.2 Conductors	53
3.3 Capacitors	64
3.4 Inductors	69
3.5 Resistors	73
3.6 Transformers	74

<b>4 Crosstalk</b>	83
4.1 Introduction	83
4.2 Crosstalk via a common impedance $Z_c$	83
4.3 Capacitive crosstalk	89
4.4 Inductive crosstalk	92
4.5 Crosstalk combinations	96
4.6 Reduction of crosstalk	104
<b>5 Cables</b>	121
5.1 Introduction	121
5.2 The transfer impedance	122
5.3 Worked examples with cables	142
5.4 Choice of cable and cable trunking	148
<b>6 Earth and reference</b>	151
6.1 Introduction	151
6.2 Earth and ground	152
6.3 Reference	162
6.4 Interrupting the earth or reference loop	174
<b>7 Screening</b>	179
7.1 Introduction	179
7.2 Attenuation of fields by metal plates	180
7.3 Faraday cage	192
7.4 Quasi-active screening	211
<b>8 Mains filters and electrical separators</b>	213
8.1 Introduction	213
8.2 Mains filters	214
8.3 Electrical separators	234
<b>9 Non-linear phenomena</b>	243
9.1 Introduction	247
9.2 Non-linear device characteristics	249
9.3 Increasing the immunity of semiconductor circuits	265
<b>10 Digital circuits</b>	283
10.1 Introduction	283
10.2 Immunity of digital circuits	284
10.3 Effect of circuit design on the disturbance margin	294
10.4 Increasing immunity by software measures	305
10.5 Emission by digital circuits	308
10.6 Interfacing	311

<b>11 Impulsive disturbances</b>	315
11.1 Introduction	315
11.2 Impulsive disturbances	315
11.3 Suppression of transients	336
<b>12 Statutory and operational requirements</b>	347
12.1 Introduction	347
12.2 International and national authorities	348
12.3 Criteria for the setting of EMC requirements	356
12.4 A few examples of EMC requirements	365
<b>Bibliography</b>	389
<b>Index</b>	413
